The Australian Bureau of Statistics (ABS) has today released the second round of data from the 2016 Census of Population and Housing.

---

This release will expand on the detailed dataset released in June 2017, adding to the high quality picture of Australia's people and the dwellings in which they live, and what has changed since 2011.

To accompany the release, the ABS has produced a Video News Release and Radio News Release to assist in reporting of the information.

Topics included are:

- Overview of information available
- Employment and Industry
- Education
- Method of travel to work
- Migration
